OBJECTIVE As a dedicated and versatile freelance web developer, I aim to leverage my expertise in front-end and back-end development, along with a strong proficiency in technologies like HTML, CSS, JavaScript, React, and Node.js, to deliver innovative, high-performance websites. With a focus on clean, scalable code and seamless user experiences, I am eager to collaborate with clients to transform their ideas into functional, visually appealing digital products.

WORK EXPERIENCE

- Junior Web Developer, Tetrangles Project Limited****Dec 2023 - Present**
 - Developed and maintained company's websites using HTML, CSS, JavaScript, and React, leading to a 20% improvement in site performance.
 - Collaborated with designers and back-end developers to implement mobile-first, responsive designs, improving user engagement by 15%.
- Freelance Web Developer****Nov 2023 - Present**
 - Collaborated with clients to gather requirements, provide project updates, and deliver high-quality websites within deadlines and budget.
 - Designed and developed custom Website for 10+ clients using Javascript and React frame work, improving customer satisfaction
- Internship, Tech Studio Academy****Sept 2023 - Nov 2023**
 - Assisted in developing front-end components using HTML, CSS, and JavaScript for company websites, improving user experience and visual consistency.
 - Integrated third-party APIs into the website for real-time data feeds, enabling dynamic updates and improving user engagement.
 - Conducted cross-browser testing to ensure compatibility and functionality across all major browsers, improving accessibility and reducing support tickets by 10%.

EDUCATION

- Tech Studio Academy****May 2023 - Aug 2023**

Java Script Full Stack Web Development

KEY SKILLS

- HTML/CSS:** Proficient in HTML for structuring web content and CSS for styling, including pre-processors like SASS
- Version Control & Collaboration:** Strong collaboration skills using Git for source code versioning and collaboration in team environments.
- Testing & Debugging:** Proficiency in writing unit tests and debugging both front-end and back-end code.
- Databases:** Experience working with relational databases (e.g., MySQL) and NoSQL databases (e.g., MongoDB).
- UI/UX Principles:** Understanding of user-centered design, wireframing, and creating visually appealing and accessible interfaces.
- Version Control (Git):** Proficiency with Git for source code management, including branching, merging, and working within a team using platforms like GitHub
- Responsive Design:** Expertise in building mobile-first designs using CSS media queries, Flexbox, Grid, and frameworks like Bootstrap.
- Front-End Frameworks:** Experience with libraries and frameworks like React to build modern, responsive user interfaces.
- JavaScript (ES6+):** Strong knowledge of JavaScript for interactive web elements and dynamic content.
- Communication & Collaboration:** Ability to work effectively with designers, developers, and clients, translating technical requirements into actionable tasks.
- Problem Solving Skills**
